

Dining Slugs

Definition of Done Criteria:

1. The task completed must have its intended purpose finished with styling considered afterwards.
2. All code must be peer reviewed and examined by co-slugs.
3. Code must abide by the coding standards created within the team.
4. A short demo of a finished task/user story should outline the work done effectively.
5. Unit testing should be implemented for functions that rely on dependencies.
6. The finished work should not have a strong dependency on other tasks from other members.
7. If help is needed to complete task, the definition of done can include the backlog of that item for the next sprint only in necessary circumstances.
