Sprint 1 Report

Product Name: Dining Slug

Team Name: Dining Slug

Date: October 21, 2018

Actions to stop doing:

1. Stop just saying what we've done and show the whole group what we've done, whether it be code or actual UI worked on during the project.

Actions to start doing:

1. Show each other the work/progress that we've made more often or in person to keep the group more informed throughout the sprint.
2. Plan out sprint reports at the thursday meeting as that is the last in-person meeting time for the week.
3. Whenever possible, plan more in-person meetings outside of the Scrum meeting to work on the project together or help alleviate any issues brought up in the Scrum meeting.
4. Keep the entire team informed on any major changes made/pushes done to the master branch.

Actions to keep doing:

1. Communicating about what we've done so far in order to keep everyone more updated.
2. Asking each other to test our stuff so that we know about the reliability of our code.
3. Collaborating on a specific task if a certain group has similar ideas.

Work completed/not completed:

- User Story 1:
    - Task 1: Completed
    - Task 2: Completed
    - Task 3: Completed
    - Task 4: Completed
